

The 3 VSL Frameworks

The three sales-video structures behind high-converting funnels — the Direct-to-Sale VSL, the Webinar, and the Call Booker. The exact section-by-section skeletons.

DTS VSL · 13 sections

DTS Webinar · 20 sections

Call Booker · 14 sections

★ Bonus · Upsell Video

What's inside

Watch Part 1 of the VSL Workshop first.

This guide is the **map**, not the training. Part 1 teaches you the offer engine and the psychology behind why these sections work. Without it, the frameworks below won't make sense — and worse, you'll fill them in with weak copy. Watch Part 1, then use this as your structural reference.

There are three ways to sell with a video, and which one you use depends on your **price point and how much trust the sale needs**. This guide gives you the section-by-section skeleton of all three — in the order you build them:

1 The DTS VSL **13 sections**
Direct-to-Sale. Video sells, they buy — no call, no webinar. Best for low-to-mid ticket.

2 The DTS Webinar **20 sections**
Teach, shift beliefs, then pitch. Best when the sale needs education first.

3 The Call Booker **14 sections**
Video filters and books qualified leads onto a call. Best for high-ticket.

★ Bonus · The Upsell Video **10 steps**
The 10-step script to add on the order-bump / one-time-offer page. Save-this template.

How to use this: pick the framework that fits your offer, then write each section in order — every section feeds the next. The structure below is the **skeleton**. Knowing the sections is easy; writing each one so it actually *converts* is the skill — and the hard part.

Don't want to write all of this yourself?

This is exactly what **Jimmy Labs** was built for. Plug in your offer and it writes every section of any of these three frameworks for you — in minutes — grounded in real customer research. You focus on getting traffic; Jimmy handles the copy.

The DTS VSL

Direct-to-Sale. One video does all the selling and sends them straight to checkout. Fast, scalable, and the workhorse of low-to-mid-ticket offers. 13 sections, in order:

1 Hook

The scroll-stopper. Call out exactly who it's for and hit the big promise in the first few seconds.

2 Shocking Statement

A bold, pattern-interrupting claim that flips a belief and forces them to keep watching.

3 Why — The Desire

Paint the dream outcome. Make them feel what life looks like once they have it.

4 Why — The Pain

Twist the knife on the current struggle and what staying stuck is really costing them.

5 Introduce the Method

Reveal your unique mechanism — the "new way" that makes the old, painful way obsolete.

6 Credibility

Why you're the one to listen to. The story that earns your right to teach this.

7 Proof

Results, testimonials and evidence that the method actually works for real people.

8 Product Overview

What the thing actually is, framed as the shortcut to everything they just got excited about.

9 The Pitch

The core offer — what they get and the transformation it delivers.

10 Bonuses

The extra value stack that tips it from "maybe" to no-brainer.

11 Guarantee / Urgency

Reverse the risk, then give a genuine reason to act now instead of "later."

12 CTA

The clear, direct ask — exactly what to click and what happens next.

13 The P.S.

The final nudge for the skimmers — recap the dream and the risk-free ask.

Use it when: your offer is simple enough to decide on in one sitting, and priced where people can say yes without a conversation. This is your default.

The DTS Webinar

Teach first, shift their beliefs, then pitch at the end. The move when someone has to think differently before they'll buy. Can run live or evergreen. 20 sections, in order:

SECTIONS 1-10 · TEACH & BUILD BELIEF

1 Hook (Bold Promise)

The big promise that earns their next 45 minutes and sets the payoff for staying.

2 Credibility (Origin Story)

Your relatable story — from struggle to result — that makes them trust you.

3 Future Pace

Have them vividly imagine life once they've got the result.

4 Set the Frame

Set the rules, kill distractions and get the micro-commitment to stay to the end.

5 3 Secrets Intro

Tee up the three belief-shifts you're about to walk them through.

6 Secret 1 — The New Way

Break the #1 false belief about the vehicle itself ("that doesn't work anymore").

7 Secret 2

Break the belief they hold about themselves ("I couldn't pull that off").

8 Secret 3

Break the belief about the outside obstacle ("I don't have the time / money / tech").

9 Transition to the Offer

The smooth bridge from teaching to selling — without the jarring "okay, now the pitch."

10 Product Overview

The offer framed as the done-for-you shortcut to everything they just learned.

The DTS Webinar

Sections 11–20 — where the teaching turns into the close.

SECTIONS 11–20 · PITCH & CLOSE

11 The Pitch

Core deliverables and the transformation, laid out clearly.

12 Bonuses

Stack the extras that crush the specific objections still in their head.

13 Trial Closes

Small yeses that warm them up and get them nodding before you name a price.

14 Price — Anchor, Drop & Reason-Why

Anchor high, reveal the real price, and give an honest reason it's this low.

15 Objection Crush

Knock down the top reasons they'd talk themselves out of it.

16 Guarantee & Urgency

Reverse the risk and give a real deadline or scarcity to act now.

17 Re-Stack

Recap the entire value stack in one breath so the price feels tiny against it.

18 CTA

The direct call to enroll now — one action, spelled out.

19 Future-Pace Close

The fork in the road: act and get the result, or stay exactly where they are.

20 The P.S.

Final recap nudge for the ones who skipped to the end.

Use it when: the sale needs a belief shift or education before the buy — new mechanism, bigger price, or a skeptical market.

The Call Booker

The video's job isn't to sell — it's to filter and book the *right* people onto a call where a human closes. The move for high-ticket. 14 sections, in order:

1 Hook

Scroll-stopper — who it's for and the promise, aimed at your ideal high-ticket buyer.

2 Shocking Statement

A belief-flipping claim that hooks the right person in fast.

3 Why — The Desire

The dream outcome, sized for the bigger transformation they're after.

4 Why — The Pain

The real cost of staying stuck — sharp enough that a call feels worth it.

5 Introduce the Method

Your unique mechanism — the reason your way gets a different result.

6 Credibility

Why you, and why your clients get results — trust at the level a big spend needs.

7 Proof

Client results and testimonials that make the outcome feel real and repeatable.

8 Product Overview

What the program is at a high level — enough to intrigue, not enough to decide alone.

9 The Pitch

Framed as "here's what we'll map out together on the call" — the call is the next step.

10 Bonuses

The value stack that makes booking a call clearly worth their time.

11 Who This Is For

Qualify hard — filter in the right buyers and filter out tire-kickers before they book.

12 Guarantee / Urgency

Reverse the risk of the call and give a real reason to book now, not later.

13 CTA

The single action: book the call. Not "buy" — one clear next step.

14 The P.S.

Final nudge to grab a slot before they close the tab.

Use it when: the price justifies a conversation and a human closes better than a checkout page. High-ticket lives here. You've got the skeletons — now fill them in, or let Jimmy Labs write every section for you at jimmylab.ai.

The Upsell Video

The short video that plays after checkout — on your order bump or one-time offer — to stack more value onto the order. This one's a full *save-this* template. Follow all 10 steps in order.

1 Congratulations + Identity

Open by congratulating the buyer and affirming who they are for taking action.

SCRIPT

"Hey, it's *[Name]*. First off — congrats on grabbing *[main product]*. That alone puts you ahead of most *[avatar]*, because you're actually doing something about *[core problem]*."

2 Set the Context

Explain why there's another offer — lowers their defense since they already bought.

SCRIPT

"Before you land on your receipt, I want to show you one thing I wish someone had given me when I first *[did X]*. You don't need this to get value from what you just bought... but if you're the type who wants *[faster / bigger outcome]*, this'll matter."

3 Call Out Their Next Problem

Name the specific friction they'll hit next — the one this upsell solves.

SCRIPT

"Here's what usually happens next: you get *[benefit]*... but then you run into *[new problem 1]*, or you struggle with *[new problem 2]*."

4 Introduce the Upsell as Shortcut / Insurance

Position it as a speed shortcut or safety net on top of what they bought.

SCRIPT

"So I created *[Upsell Name]* to fix exactly that — think of it as a *[shortcut / safety net / done-for-you layer]* on top of what you just got. In plain terms, it helps you *[specific result]* without *[the annoying thing they dread]*."

5 What's Inside (3–5 bullets)

Talk benefits, not just features — what each piece does for them.

SCRIPT

"Inside you'll get: *[Bullet 1 — fastest, most tangible piece]* · *[Bullet 2 — removes a big headache]* · *[Bullet 3 — boosts confidence / success rate]*."

The Upsell Video

Steps 6–10 — the close.

6 Contrast: With vs Without

Ethical and pressure-light, but makes the gap obvious.

SCRIPT

"Could you do *[outcome]* without this? 100% — you already bought what you need. This just makes it faster and more certain. With it, you *[best case]*. Without it, you'll probably *[realistic friction they already fear]*."

7 Price + Anchor + "Since You Just Bought" Deal

Anchor the normal price, then a one-time add-on deal for acting now.

SCRIPT

"Normally *[Upsell Name]* is *[higher price]* on its own. But since you've already invested in *[main product]* and you're clearly serious, I'll let you add it to your order for just *[upsell price]* today — one time only, not available anywhere else at this price."

8 Simple Guarantee / Risk Reversal

Remove the risk so saying yes is easy.

SCRIPT

"And if you add it and don't think it helps you *[outcome]* in the next *[timeframe]*, just email us and we'll *[refund / credit / swap]*. I'd rather you try it and win than sit there wondering."

9 Clear, Binary CTA

One yes, one no — spelled out exactly.

SCRIPT

"So here's what to do: if you want *[the shortcut]*, click 'Yes, add this to my order' — it's added instantly and shows on the next page. If you'd rather pass and do it the long way, click 'No thanks' and we'll take you straight to your receipt."

10 Close With Identity Again

Reaffirm they're in — and nudge the action-takers to stack the deck.

SCRIPT

"Either way, I'm pumped you're in *[main product]*. But if you know you're the type who likes to stack the deck in your favor — hit 'Yes' now, and I'll see you inside *[Upsell Name]* too."

Save this as your template. For every upsell video: swap in the product name, avatar, and "next problem," adjust the price & guarantee — and keep the 10-step structure identical.
